

### **What is the scheme?**

The idea behind the Fundraising Scheme is to provide schools, charities, and youth organizations with an opportunity to raise funds by selling Christmas trees. The scheme was developed for schools who were looking for creative ways to run fundraising events centred around the holiday season.

### **How does it work?**

The scheme works in a simple manner. The participating school or organization takes orders from parents and supporters through various channels such as the school Christmas fair, letters or emails. They offer these individuals the chance to purchase high-quality Christmas trees from the school at a significantly lower price than what they would typically pay at a garden centre.

Once the orders are collected, simply send us your order sheet with your confirmed number of trees. We will then arrange your order to be sent to the selected delivery point. The organizers then deliver the required number of trees to the customer. This allows the school to make a good profit with minimal effort and investment.

Please do read the separate schools information sheet to see further information on how the scheme works and operates.

### **Why is it good for you?**

- No upfront payment required! We will invoice you once you have received your trees and had a chance to start delivering them.
- Easy to sell the trees! Nearly everyone needs one and how better to buy one than supporting local schools.
- The school makes high profit

- No risk! You can order trees that parents have already pre-paid for.
- We supply top quality, high-end trees, fell at the perfect time to avoid needle-fall.
